C. D. Knight, Well Loved Professor Dies Suddenly After Short Illness

Was Widely Interested in Student Activities On Hill; Funeral Took Place Saturday

Carl Dunham Knight, Professor of Experimental Electrical Engineering, passed away Wednesday morning at Hahnemann Hospital after a week's illness. His death was a great blow to faculty and students alike, for he was one of the best liked and most sincere instructors on the Hill. Prof. Knight had been a member of the faculty for

CARL DUNHAM KNIGHT

thirty-six years, and during that time took a considerable part in both the extra-curricular and everyday activities of the school. This is shown by the fact that he was one of the two faculty members of the Tech Council, a member of the two national honor fraternities, Tau Beta Pi and Sigma Xi, and the social fraternity, Lambda Chi Alpha. Known as "C.D." to a great many of the students, especially the upperclass electricians, he was affiliated with the American Institute of Electrical Engineers, the Illumination Engineering Society, and the Society for the Promotion of Engineering Education.

Professor Knight was born in Putney, Vt., attended the local schools and graduated from the Brattleboro, Vt., High School in 1899. He attended W.P.I. and graduated with a Bachelor of Science Degree in 1903. Immediately after graduation, he worked as a test-man for the General Electric Company of Schenectady, N. Y.; then returned to Tech as an instructor in the Electrical Engineering Department, and, in 1908, was awarded the professional degree, Electrical Engineer. In the same year, he was advanced to the position of Assistant Professor of Experimental Electrical Engineering and in 1920 was made a full Professor. In 1906, he had taken over the duties of superintendent of electrical maintenance, the largest single task of which was the design of the lighting and power layouts for any new construction that took place. He designed the lighting and power facilities for Kinnicut Hall, the new Alden Memorial, and the proposed Mechanical Engineering Building. As he took such an active part in the design of the Electrical Engineering Building, Prof. Knight was placed in charge of the laboratory courses when the building was completed. Outstanding among the equipment that was maintained by the department up to a few years ago, was an electric railway test car that

Skis Keep Tech Birdmen in Air

Twenty-one Men Have Earned Solo Pilots' Permits So Far

While flyers at many airports in New England have been grounded by snow on the fields, skis developed in the Tech laboratories have made it possible for members of the C. A. A. from W. P. I. to continue their flight training throughout the winter. Though the flight schedule is slightly behind in some cases due to stormy weather conditions, the majority of the students have passed the requirements for solo licenses and, with lengthening days making more flying hours per day possible, it is expected that all applicants will have their solo permits within a few weeks.

Through the foresight and efforts of the members of the aeronautics department, the members of the W. P. I. division of C. A. A. have been able to fly with skis while the airport has been blanketed with snow. Last May the members of the department, directed by Prof. Merriam, assumed the task of redesigning a set of airplane skis which had been rejected by federal inspectors. The strength of the skis had to be greatly increased to stand the shocks in landing a plane, but it was necessary to keep the weight of the outfit

(Continued on Page 2, Col. 5)

Committee Picked For At Home Day

At Home Day, this year, will be May 11, 1940. On this day, the public will be invited to visit the Institute to see the campus, the equipment, and to observe various demonstrations staged by each department. The purpose is to familiarize prospective Freshmen and their parents with many of the advantages that Worcester Tech affords the students.

The At Home Day committee, which is headed by Professor Gleason H. MacCullough, will consist of several of the faculty and also students who will represent the different classes, organizations, and fraternities. The faculty members have not been chosen yet but the student members have been elected, and are, with the organization they represent, as follows: Robert E. Dunklee, Jr.—Tech Council; Raymond I. Forkey—Senior class; Donald E. Smith—Junior class; Norman A. Kerr—Sophomore class; Richard D. Stoller—Freshman class; Kenneth R. Blaisdell—A.S.M.E.; George S. Bingham—A.S.C.E.; Howard L. Anderson—A.I.E.E.; Alfred E. Winslow—Skeptical Chymists; Richard H. Kimball, Jr.—Camera Club; Stanley J. Majka—TECH NEWS; Kenneth B. Benson—Radio Club; Stannard M. Potter—Musical Association; Robert E. Higgs—A.T.O.; Edward M. Bates—L.C.A.; George W. Knauff—P.S.K.; Carl F. Fritch—P.G.D.; Edward E. Hafey—S.A.E.; Donald L. Stevens—S.P.E.; Robert S. Roulston—T.C.; Victor J. Lombardi—T.K.P.

Tech News Staff Elected Last Friday

Majka and Jacober Head Editorial and Business Staffs

At the Tech News Association meeting held on Friday, March 1, the TECH NEWS staff for the coming fiscal year was chosen. This practice is in accordance with the usual custom, for with the system of Spring elections, the older and more experienced members of the Senior Staff remain to help their successors. Since there are always more applicants for successively higher positions, the selection of a responsible Senior and Junior staff is assured.

The Association elected the following men: Stanley J. Majka, Editor-in-Chief; R. Keith McIntyre, NEWS Editor; Stephen Hopkins, Managing Editor; Kenneth R. Dresser, Sports Editor; Edward G. Jacober, Business Manager; Benjamin W. Phelps, Circulation Manager; and Hilliard W. Paige, Secretary. The following men were chosen as Junior Editors: Rodney G. Paige, Raymond Wynkoop, Charles B. Sutton, George F. Barber, Paul C. Disario, Jr., and John M. Townsend. Herbert E. Brockert and John Ford, Jr., were elected to the positions of Assistant Business Managers.

Stanley Majka, the new Editor-in-Chief, is a resident of Three Rivers, Mass., a member of Professor Locke's "Dorm Squad". Majka is assistant manager of the Tech tennis team, a member of the A.S.M.E., and an active member of Theta Kappa Phi, and the Newman Club.

The new staff takes over immediately after election and puts out the first issue with the help of the retiring staff. Those men elected as Junior Editors are the first to do so under the amendment effective this year whereby reporters must have written at least two hundred inches to be eligible for election.

CLASS JACKETS

All Sophomores intending to purchase college jackets to be worn at the Soph Hop should report at the Gym on Wednesday and Thursday, March 13 and 14, between four and six o'clock for measurement. Mr. Farrar, the Premier Tailor, will be on hand to perform the necessary operations. A five dollar deposit will be necessary at this time to insure purchase. The total cost of the jacket will be \$12.40 which will cover alterations. Men desiring jackets with numerals other than '42 may obtain them at 50 cents extra. The price of jackets purchased next fall will be \$1.50 more. However, if the five dollar deposit is paid now, no extra charge will be made for fall delivery. A sample jacket will be on display on Thursday. For further details see Norman Kerr.

Forkey, Bellos, Wells Lead Scoring In Uphill Battle

Senior M.E.'s Hold Eventful Splash Party

Mechanics and Faculty Have Gay, Lively Time In Alumni Gymnasium

On Friday evening, Alumni Gymnasium and Fuller Pool were the scenes of a highly successful Senior Mechanics splash party. At eight o'clock the festivities got under way, and from that time until curfew at twelve, the Gymnasium was under the influence of one of the gayest crowds that has attended any Tech function so far this year.

One of the ordeals which each member of the fair sex had to undergo was a strength test, exactly similar to that which tortures every sophomore and freshman twice a year. The results were really amazing. At least, the lung capacity test conclusively proved that the girls have a great deal of wind. Following this mild form of exercise, the "splashers" engaged in assorted games of squash, pingpong, basketball, and just plain recuperating. The basketball prowess of the girls was actually astounding. When it was suggested that the participants play according to the girls' rules, the girls howled with derision, and then proceeded to outplay the strong, handsome mechanics at their own game.

Following this sports period, everyone entered Fuller Pool, whose crystal clear waters were soon split asunder by the knife-like dives of the girls, and the terrific concussions of the Mechanics getting a first hand acquaintance with aqua pura. All the faculty were requested to "go jump in the lake" and many of those who refused were appropriately taught the art of dunking. Games of "Follow-the-Leader" were made very interesting by the

(Continued on Page 3, Col. 3)

Dr. Wendt, Fuller Lecturer Thursday

Dr. Gerald Wendt, Director of Science and Education at the New York World's Fair and internationally known lecturer and writer on scientific subjects, will be the speaker at the assembly on Thursday, March 7.

Dr. Wendt held a teaching post at the University of Chicago until the First World War when he resigned to serve as Captain in the Chemical Warfare Division. After the war he went back to the classroom. A few years later, he accepted the position of director of research for the Standard Oil Company of Indiana. Dr. Wendt organized and directed the Battelle Memorial Institute for Industrial Research at Columbus, Ohio. Afterward, he was appointed Dean of the School of Chemistry and Physics at Pennsylvania State College. He has also held the position of director of the American Institute of the City of New York and is a former editor of "Chemical Review."

Shlora and Lotz Stem Strong Nutmeg Attack

Before a large, enthusiastic crowd, the Worcester Tech basketball team came from behind to win a close game with University of Connecticut by the score of 63-60 in a duel that rocked the rafters of Alumni Gym last Saturday night. This game was without a doubt the most exciting forty minutes that has been seen during the present season by Worcester basketball rooters. The audience saw the Nutmeg team snatch an early lead and stretch it to 12 points at the half; the second half, however, found a changed Crimson and Grey team take the floor with dynamite in its attack, which blasted away the opposition and gave Tech the decision.

Ray Forkey was the shining star of the evening on offense, and his excellent aim on the basket was seemingly unerring. It is hard to name the outstanding player of the evening from Connecticut for three men were very noticeable by their good brand of play: they were Captain Peterson, Donnelly at forward, and Winzler at guard. Bob Lotz turned in what is probably his best performance of the season, for he guarded the Tech basket in a manner which bespoke failure for many a Nutmeg scoring attempt. High scorers for Tech were Forkey, Bellos, and Wells with 24, 19, and 15 markers respectively, while Donnelly with 20 points, Peterson with 17, and Yusiawicz with 13 were the eagle eyes for the visitors.

The game which saw the Engineers go into the lead with six minutes to go in the last half, was the first victory in five encounters with the Connecticut team. Last year saw the Tech team on the short end of the score in a closely battled game which was as exciting as this season's duel. To a spectator who had no way of identifying the Tech players, it would almost appear that Coach Bigler used two teams. The team that struggled through the first half was kept in the running by Forkey's infallible ability to swish the net. The Boynton Hill team that entered the second half was, in comparison, a fast breaking, smoothly operating team that clicked in shooting basket after basket, but kept the Conn. Staters' scoring activities a little bit more under control than in the first half. The game, being closely contested, was naturally filled with fouls, and the referees called 14 violations on Tech and 11 on the visiting team. The closing minutes of play found Lotz and Shlora of Tech, and Winzler of Conn., leave the game. Both Peterson and Brooks had three fouls on them as the game closed.

Shortly after the opening whistle blew, Yusiawicz tallied on a foul try, and then Wells retaliated with a point garnered in the same manner. The visitors were not out to fool around, however, and in spite of Ray Forkey's stuffing of the basket they soon took the lead 11-9 after five minutes of play. Winzler, who played at guard for the Nutmeggers, was the amaze-a-minute player for repeatedly when left un-

In Memoriam

To all students he was a true friend, a conscientious, understanding teacher; to all members of the faculty, a man whose sterling qualities were worthy of admiration. In these few words could one portray the nucleus of the character of Carl Dunham Knight, professor of experimental electrical engineering.

The years may go on, but in the memory of the many students, whom he had taught so patiently for the past thirty-six years and a great number of whom he personally counselled in life's ways, there will last a fond farewell for our departed comrade.

Not only was he a teacher who inspired his pupils to greater efforts in the classroom, but he also took active part in their daily affairs. In matters of personal concern his influence was great and his judgment truly respected. Through his affiliation with the Tech Council, as one of its two faculty advisers, Prof. Knight was able to follow the trend of student opinion. As faculty treasurer of Tau Beta Pi, his interest helped to maintain the stability of this honorary organization from year to year. Close to his heart were the boys of Lambda Chi Alpha whom he served ably as treasurer of the advisory board.

Besides carrying a full schedule of classroom and laboratory work, in the laboratory which he himself designed, Prof. Knight still had time for activities outside of regular college work. Versatility and energy kept him up with world affairs. Membership in the Economic Club accentuated this tendency.

His religious ideals were of the highest order and a desire to nurture in the students the idea of clean living and clean speech permeated all his actions. He strongly campaigned against profanity which raised him in the esteem of all who knew him.

The TECH NEWS staff feels certain that the student body will join us in expressing these few sincere words for one who will not be quickly forced into oblivion. To Mrs. Knight we extend our heartfelt sympathies.

The Past — The Future

With this issue of the TECH NEWS has ceased to be under the jurisdiction of the former staff and ventures forth under new management. But you have noticed this in your perusal of our paper, haven't you? The fact of the matter is that we congratulate the departing staff on its remarkable performance and thank them for preparing us to fill their shoes.

Did we say that we were ready to step into their positions? You decide. Read the articles, judge them, criticize. We are green and inexperienced; the bigness of the task is staggering.

Our aims are to print accurate, impartial, and well written articles. "News when it is news" will continue to be our motto. Realizing that this is the official organ of the student body, only the true spirit of the college will be printed on these pages. Remember, open forum letters are encouraged and anything which contributes to the betterment of the college will be gladly accepted. The Alumni keep in close contact with W. P. I. through the eyes of the TECH NEWS and the *Alumni Journal*; we hope to present the correct picture to them. Finally, if there is anything whatsoever that we can do to bring the students and faculty closer together, we will do it.

Club News

CAMERA CLUB

The Tech Club held its first meeting of the second term on Friday, March 1, at 7:30 P. M., in Boynton 19. After a short business meeting, the remainder of the evening was turned over to Mr. Frank A. Cox, of the M. J. Whittall Associates, Inc., who presented an informal talk on various phases of the use of color films for commercial work.

Mr. Cox's talk proved to be interesting, instructive, and amusing. He told of his own associations with the use of color films, extending from the time of their introduction to the present. Mr. Cox showed transparencies he had taken in connection with his own field, the manufacture of rugs. When viewed with a magnifier, these transparencies exhibited remarkable color and detail, duplicating the original rugs on a miniature scale. They are quite practical, Mr. Cox pointed out, as these transparencies enable salesmen to dispense with trunk-loads of actual samples.

After several amusing anecdotes, a question period followed. The meeting was then adjourned.

NEWMAN CLUB

A meeting of the Newman Club will be held in Sanford Riley Hall on Tuesday evening, March 5, at 7:30. This is one of the most important meetings of the year and all Catholic students at Tech are urged to attend. Plans for the Palm Sunday Communion Breakfast will be discussed.

C. D. Knight Dies

(Continued from Page 1, Col. 1)

was used all over New England to test traction lines. At the time of his death, Prof. Knight was teaching four laboratory courses in addition to an introductory course and a class in illumination. For the time being, Prof. Siegfried will teach the illumination course, while Prof. Locke will do the electrical maintenance work of the Institute and Charles Thulin will work in on the laboratory courses.

Among other duties that Professor Knight undertook was the post of faculty marshal and that of committeeman on the faculty grouping which has charge of the maintenance of buildings and grounds. Outside of school, he took an active part in many of the organizations found throughout the city. He was a member of the Central Congregational Church, the Passion Play cast of a few years ago, the Economic Club, and the Appalachian Mountain Club.

The funeral services were held at Central Church, Saturday afternoon, with Rev. Pierson P. Harris, pastor, officiating, assisted by Rev. Shepherd Knapp, pastor-emeritus. The honorary bearers were Prof. Jerome W. Howe, Dean of Admissions and Students, Dr. Francis W. Roys, Dean of Engineering, John E. Woodbury, Allison P. Ball, Frank C. Harrington and David K. Arey. Many faculty members and students were present at the services and a great many of the school's organizations sent floral offerings. Burial will be in his home town of Putney, Vt., in the Spring.

The fine tribute that was paid Prof. Knight was all that was due a man who was so well liked by everyone that knew him. Few of the students who have graduated from the Electrical Engineering Dept. will soon forget his excellent and well-founded advice; nor will the members of the Tech Council and the other undergraduate groups with whom he came into contact.

Tech Flyers

(Continued from Page 1, Col. 2)

down to a minimum. Extensive tests of the ski boards were conducted and several designs for reinforcement were considered and rejected. After devoting a month's spare time to the problem, the department finally agreed on a design which increased the strength five hundred per cent with less than twenty-four per cent increase in weight. The combined weight of the original ski board and pedestal was fourteen and seven-eighths pounds, while the redesigned and strengthened outfit weighs eighteen and three-eighths pounds.

Operating in the snow has helped the students immeasurably in flight training, though a few unfortunates have run into stormy weather and low ceiling on days scheduled for flights and have been unable to fill the requirements for solo licenses as yet. The department plans condition exams in several courses at an early date and federal examiners are scheduled to come here within a month to give exams in three courses. With the lengthening days, spring flights will be scheduled later in the afternoon and if absolutely necessary Prof. Merriam

RIGHT OR WRONG?

A 2-minute test for telephone users

1. It's impossible for you to telephone to people in two different cities at the same time.

RIGHT ☐ WRONG ☐

2. Police Radio Telephone made by Western Electric is an outgrowth of research at Bell Telephone Laboratories.

RIGHT ☐ WRONG ☐

3. About 75% of the Bell System's 85 million miles of telephone wire is contained in cable.

RIGHT ☐ WRONG ☐

4. Lowest telephone rates to most out-of-town points are available every night after 7 P. M. and all day Sunday.

RIGHT ☐ WRONG ☐

ANSWERS:

1. Wrong. Telephone Conference Service enables you to talk simultaneously with as many as five other people.
2. Right. And that's true also of broadcasting equipment, aviation radio telephone and marine radio telephone.
3. Wrong. Over 95% is now protected by cable — nearly 5% of which is underground.
4. Right. Why not telephone home oftener? Your family will enjoy it — so will you!

BELL TELEPHONE SYSTEM

Sports Sidelights

By Charles L. Hoebel

Tech winds up its basketball season this week with two home games, the Rhode Island Rams on Wednesday and Rennsalaer's team on Saturday. Wednesday's game should be something to see. Outstanding "Stutz" Modzelewski will try to lead the Rams in a revenge for last year's defeat at the hands of Tech. A powerhouse in his own right, Stutz has been piling up the points this season to now lead the scorers in New England both for points per game average and for total points. In fact, he will come to Worcester Wednesday only nine points short of the New England scoring record set by his predecessor on the R. I. team, Chet Jaworski. And he still has one more game to go after Wednesday, so it seems highly improbable that he will fail to pass Jaworski's standard. . . . The rest of the Ram quintet are all good players, too, playing a terrific all-offense-very-little-defense game. They figure, let the other fellow take his shot, take the ball from the backboard or outside, and tear down and grab off two points. A fast-cutting, eagle-eye team, they should provide plenty of action Wednesday. . . . Here are some of the scores by which they have won this year: Assumption, 99 to 34; St. Anslem, 72 to 48; Connecticut U., 102 to 81; and last Saturday, Providence College, 76 to 62. Brown University is the only New England college team that they bowed to this season. . . . For several weeks they have been ranked the top team in New England. . . . After three top-flight teams in a row, Tufts, Conn. U., and Rhode Island, R. P. I. on Saturday should be a little easier going. They have been playing through a mediocre season, winning a few more than they lost. Few of the teams they played this season are on Tech's schedule, so there is little basis for comparison. . . . The swimming team, with five straight wins, travel to Boston Saturday to try to make M. I. T. a sixth. Early in the season, the Mass. Tech team beat the B. U. natators by a 46 to 29 score. Then the Worcester Tech team won its third by beating the same B. U. team by a 53 to 22 score. . . . Win or lose on Saturday, the tank team will finish up the most successful season ever enjoyed by a Tech swimming team. Records have changed rapidly enough this year to make one dizzy, team records and individual marks.

Tech Upset By Strong Tufts Quintet

Bellos, Wells and Forkey Are High Scorers For Tech

Paced by the fast, clicking combination of Tibbs, Jenkins, and Varney, the Tufts College team pulled the surprise of the season in taking over the Tech invaders last Wednesday night. Tufts, displaying its best shooting of the season, turned back Tech, 54-36. This is Tech's fourth defeat in fifteen starts. While the Jumbos went into the game with a reputation of being one of the hardest teams to beat on its home floor, Worcester Tech was the paper favorite. Tufts has had an off and on season and had previously bowed to Harvard, Mass. State, Brown, and Rhode Island State. However, Coach Art Cochrane's quintet had an 11-6 advantage over Tech at the end of the first five minutes of play.

Tufts, surging steadily forward, retained its lead. The combined shooting of Captain Tibbs and Varney of Tufts was one of the main reasons for the score's standing 29-10 at the half. Tufts. Co-Captain Forkey's lone basket was the only contribution to Tech's side of the ledger during the last seven minutes of the first half.

At the beginning of the second half, Tech opened up with the best blast of the game. Wells and Bellos started clicking in normal fashion, and the Engineers rallied. However, Tech failed to maintain the pace and fell behind, never to recover although Tufts had an entire substitute team on the floor during the last three minutes of play.

Splash Party

(Continued from Page 1, Col. 4)

attempts to copy a one-and-a-half or a back jack with a full twist, which some of the girls executed with commendable precision.

After having decided that they had bathed enough until next June, the Mechanics and party retired to the reception room of the Gymnasium where sandwiches, coffee, and ice cream and cake were served. A question-bee was then held in the reception room. Professor Roys gave a thirty second abstract on the technique of speaking, and was awarded five points for poise, and minus five for content.

Dancing followed the quiz session, and Randy Whitehead entertained the party by playing the piano and singing in his own inimitable fashion. At twelve o'clock, all the party members closed the festivities by joining in the singing of "Auld Lang Syne". The wistful wishings of all the Mechanics and their lovely guests was that an affair like this could be held each week. This expressed a great deal more deeply than words of praise, the appreciation that everyone had of the efforts expended by Frank Crosby and his committees to make such an enjoyable occasion possible.

Rollins College this year has an equal number of men and women students.

W.P.I. Swimmers Duck Connecticut In Final Event To Win 43-32

Tech Takes Third In Conn. Valley Track Meet

Six Man Team Captures Three Firsts as Fritch Wackerbath, & Lotz Star

Worcester Tech received a special invitation to the first Conn. Valley Indoor track meet which was held Saturday, March 2, at the Mass. State cage. A total of five schools were represented in the meet; U. of Conn. and Mass. State sending full teams, with W.P.I., Springfield College, and Trinity sending representatives.

The Worcester team, though lacking in numbers, came through with third place behind U. of Conn. and Mass. State.

Carl Fritch, ran the fastest 35 yard dash of his career, to win the 35 yard dash in 4.3 seconds. Later, he came back to win his heat in the 300 in 34.6, which would have been a new M.S.C. record, but O'Connor of State took the next heat in 34.4 for a new record. The 300 being run against time with the time of the three heats compared, gave Mass. State first and Fritch a second.

Tech took both 1st and 2nd places in the broad jump. Fred Wackerbath repeated his last week's victory, with "Al" Tenney a close second. Wackerbath won the event with a jump of 5'9 1/4" and then brushed the bar, as he attempted to break his own week-old record with the bar at 5'11 inches.

Bob Lotz annexed another first with a toss of 51'7". This avenged his loss of last week to Pollard of Tufts by a single inch.

Dave Nye placed fourth behind U. of Conn. who placed three men in the 2 mile event. This meet completes the indoor season for the Engineer tracksters.

Commerce Five Sinks Tech Jayvees

The Tech Jayvees lost for the second time in a week last Saturday night, when the Commerce High team triumphed over them with a score of 30-27. The Commercials started the game by drawing first blood in the opening minutes of play. Then Don Smith sparked the Tech men into action by tallying a layup for Tech. The quarter ended at 10-8 with Commerce in the lead.

It was in the fourth quarter that Lipovsky tied the score at 21-21. His teammates followed up with another basket and put Tech in the lead by two points. Commerce steadily pulled out in front, however, to remain there and win by a score 30-27.

Sophomore Warren Harding lead in the scoring by netting his team a total of ten points.

Chamberlin, Paige, Wynkoop, Riddick Splash Way To New Record in 400-Yard Relay

The Tech swimming team won their fifth straight victory last Saturday, March 2, when they nosed out the University of Connecticut by a score of 43-32, in the last event. Only one record was broken this week and that was only a week old. The 400 yard relay team splashed their way to a new college record, cutting two-tenths of a second off last week's time which also bettered the old college standard in this event.

The first event was the 300 yard medley relay. The Tech team, composed of Fred Shippee, Steve Hopkins, and Fred Chamberlin, battled a stiff Connecticut contingent along the whole distance and in the last few yards, nosed them out.

The 220 yard freestyle saw Stirling and Paige of Tech take second and third respectively when Stirling was beaten by a touch by Ross of Connecticut.

In the 60 yard freestyle, Captain Bill Riddick and Ray Wynkoop netted a first and second for Tech. Riddick was not pushed in this race, as the time, 31.0 seconds, indicates.

The Connecticut team came back in the dive when Shapiro won a close decision over Walt Kennedy. Johnny Ingham netted a third place for Tech.

Riddick won his usual first place in the freestyle century. Bill Jackson, a sophomore, took a neat third place for Tech.

However, Connecticut came back again to take two places away from Fred Shippee, Tech's ace dorsal swimmer. The race was close throughout the whole 150 yards, but as Shippee's turns continually lost him yardage, Chamberlain and Goldfarb finished in first and second place for Connecticut.

In the 200 yard breaststroke Burndage, of Connecticut, and Clark Goodchild, of Tech, battled the entire ten laps for first place. Burndage edged Goodchild out in the last lap. Hyman took third place from Tech's Steve Hopkins.

Stirling came back in the freestyle quarter-mile and won easily over Huyles, of Connecticut. Ceschavitch took third place in a thrilling last lap battle with Tech's Walt Crandell.

Tech's 400 yard freestyle relay team, composed of Chamberlin, Paige, Wynkoop, and Riddick, proved too strong (Continued on Page 4, Col. 2)

guarded near midcourt he would draw a bead on the basket and pop in two points. The score remained fairly close until the last few minutes of the first half, when Donnelly, Capt. Peterson, and Yusiewicz took matters in hand and tossed their team well into the lead. As a result the period ended with Tech trailing by 12 points in a 33-21 score, and with Worcester basketball fans about to go back to the memories of former Tech teams.

The second half opened with a revived group of Engineers who kept the scoring honors evenly divided at first but then they rallied to cut down the lead to six points at the ten-minute mark which found the score at 50-44. Then—Wham!! The Tech offensive started to click and the defense put the visitors to rout. In just a few minutes of play Forkey, Bellos, and Wells went on a scoring spree while a startled Connecticut team found the basket only once. The lead went to Worcester and stayed there, but Connecticut was in there battling and as a result the score board rocked and groaned under the strain of recording nearly twenty-five points in five minutes of play. Bellos added to the excitement by snatching the ball from a startled Nutmegger and dribbling down the floor to sink two points before the visitors could recover. He repeated this feat three times to the delight of a cheering audience. With a few minutes of the game left, Oneglia and Lambert entered the game and took up where Shlora and Lotz left off. A few seconds later Winzler left the game after an outstanding performance at guard for the visitors. In spite of these substitutions the game did not slow up and as the final gun went off the visitors were battling in Tech territory for the few points that separated them from victory, but left them on the short end of the 63-60 final score.

The Bigermen are going to entertain the high-scoring Rhode Island team on Wed., March 6, in a game that should prove every bit as interesting as the Connecticut duel for both teams. On Saturday evening the Boynton team will close their season in a game with R.P.I.

for the University men and won by a good ten feet.

Next week will see the Tech mermen travel to meet a weak M.I.T. team in Boston. If Tech wins this meet, their last of the season, it will give them a record of six wins against only three losses.

SUMMARY:
300-yard medley relay—Won by Worcester Tech (Fred Shippee, Steve Hopkins, Fred Chamberlain); 2nd, Conn. (Roger Chamberlain, Albert Hyman, Anthony Sarratt). Time, 3 min. 18 sec. flat.

220-yard freestyle—Won by Stanley Ross, Conn.; 2nd, Harry Stirling, Tech; 3rd, Rodney Paige, Tech. Time, 2 min., 29 2-5 sec.

60-yard freestyle—Won by Willard Riddick, Tech; 2nd, Ray Wynkoop, Tech; 3rd, Laverne Williams, Conn. Time, 31 sec. flat.

Low board diving—Won by Robert Shapiro, Conn., 79.77 points; 2nd, Walter Kennedy, Tech, 69.97 points; 3rd, John Ingham, Tech, 68.00 points.

100-yard freestyle—Won by Willard Riddick, Tech; 2nd, Anthony Sarratt, Conn.; 3rd, William Jackson, Tech. Time, 54 4-5 sec.

150-yard backstroke—Won by Roger Chamberlain, Conn.; 2nd, Samuel Goldfarb, Conn.; 3rd, Fred Shippee, Tech. Time, 1 min., 50 sec. flat.

200-yard breaststroke—Won by Kenneth Brundage, Conn.; 2nd, William Goodchild, Tech; 3rd, Albert Hyman, Conn. Time, 2 min., 50 sec. flat.

440-yard freestyle—Won by Harry Stirling, Tech; 2nd, Richard Huyler, Conn.; 3rd, Al Caskavich, Conn. Time, 5 min., 34 4-5 sec.

400-yard relay—Won by Worcester Tech (Fred Chamberlain, Rodney Paige, Ray Wynkoop, Willard Riddick); 2nd, Conn. (Walter Burr, Anthony Sarratt, Robert Shapiro, Stanley Ross). Time, 3 min., 50 1-5 sec. (New college record.)
